AMT	Asset Management Team
CAM	Corporate Asset Management
SME	Subject Matter Expert
SAMP	Strategic Asset Management Policy
SC	Steering Committee

Introduction

The Asset Management (AM) governance framework considers asset management using multi-disciplinary and integrated activities or a holistic approach. The AM governance identifies the “why, what and who” of asset management for the town. The governance framework will include:

- a purpose statement
- a description of activities involved in asset management
- an identification of stakeholders.

Purpose

The objective of the Asset Management Governance Framework is to enable the stakeholders of the town to understand their roles in improving and enhancing the services of the town by promoting better asset management techniques.

Ontario Regulation 588/17 requires the Strategic Asset Management Policy (SAMP) to indicate the individual who provides strategic advice and direction on how to guide the asset management plan. The regulation also emphasizes that there should be an integrated approach to asset management where stakeholders from all departments have a stake in asset management goals, including their integration with the larger community.

Asset Management is an integrated business approach involving finance, engineering, operations, planning and management to effectively manage existing and new infrastructure to balance costs, opportunities and risks to provide satisfactory levels of service to the community. As there is emphasis on this integrated approach, the Town of New Tecumseth has involved major service areas to be part of the asset management governance that will enable the town to make evidence-based decisions that will benefit the community. There are two types of stakeholders:

Internal Stakeholders

The internal stakeholders are the council, management and service areas or departments who are involved in developing asset management policies, plans and maintenance strategies. The service areas that have assets are involved in accountability for the asset inventory, asset condition, asset maintenance and meeting the levels of service for their service areas.

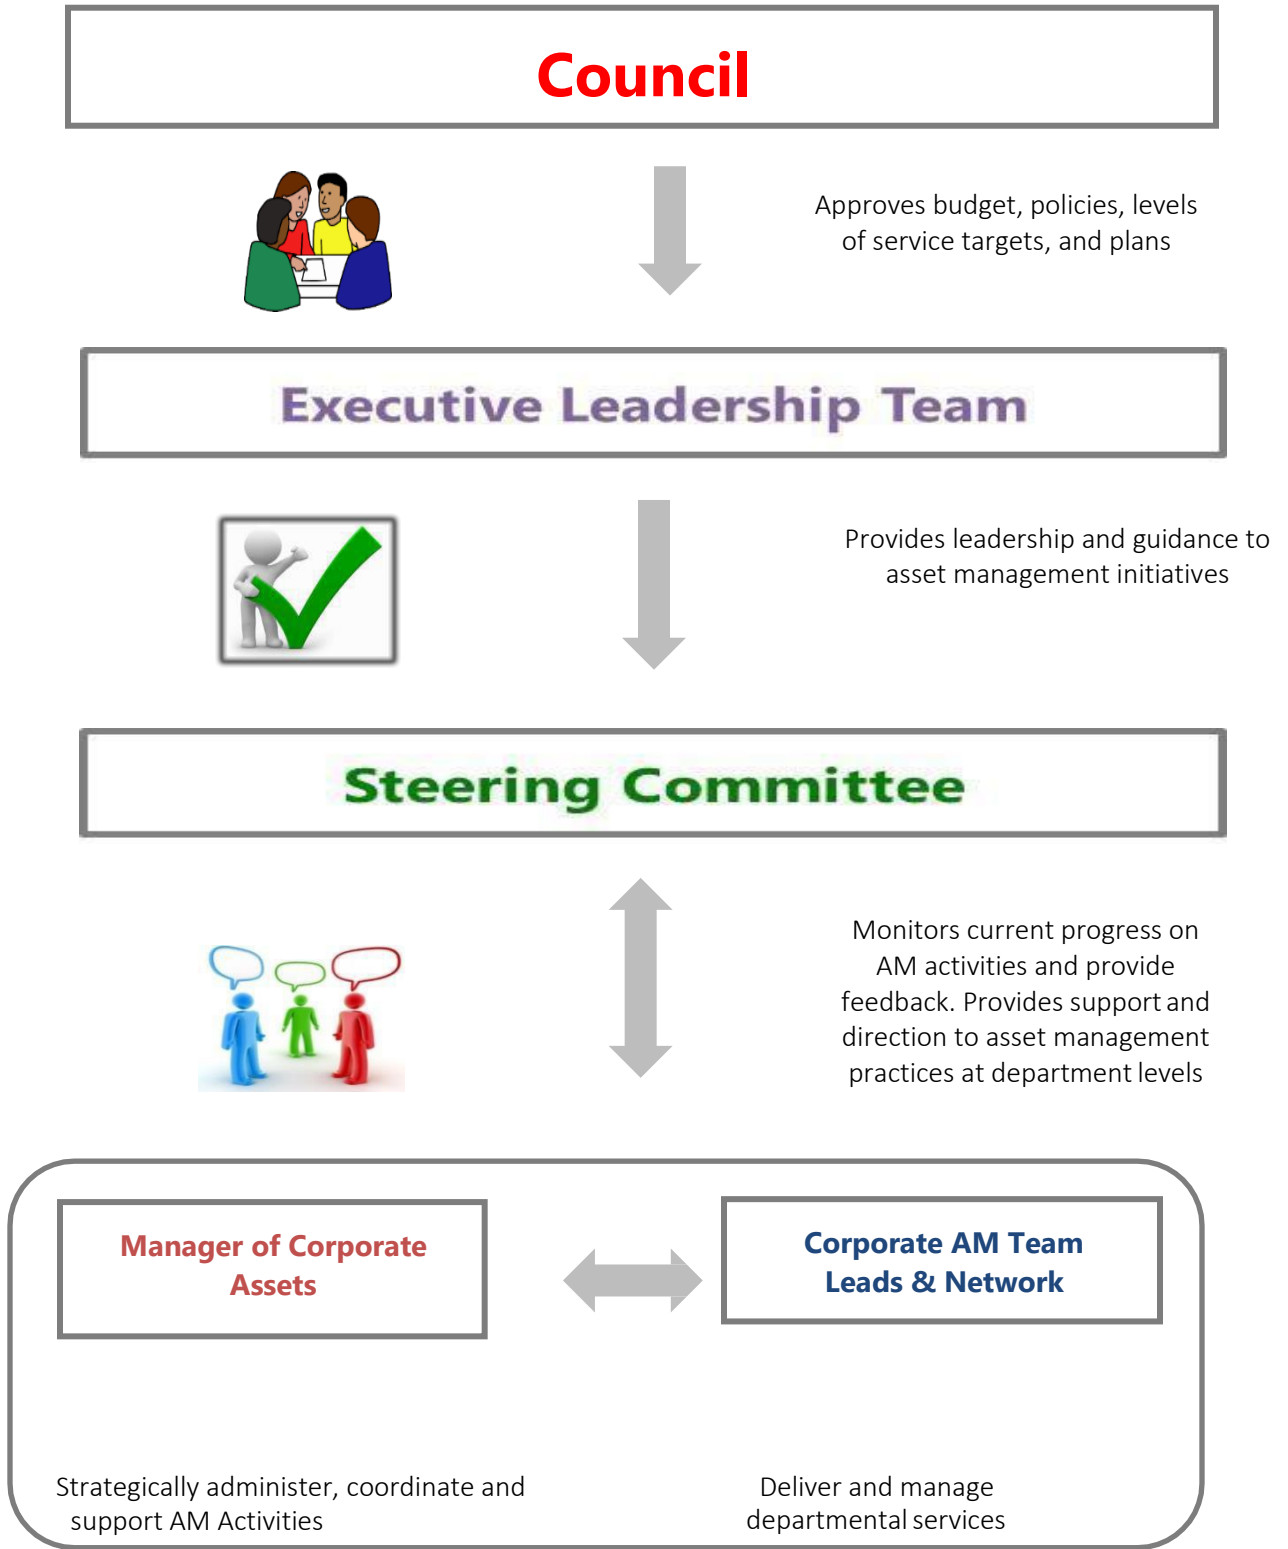

External Stakeholders

The external stakeholders include the provincial and federal governments, contractors, developers, legal authorities, regulation and policy makers, associations, professional bodies and the residents of the town.

The acknowledgement and endorsement of the framework is an important step in integrating the collective efforts of all the departments and stakeholders to address the common strategic objectives. Table 1.1 provides a snapshot of the AM governance for the Town of New Tecumseth

Asset Management Governance

Figure 1.1 AM Governance at Town of New Tecumseth

Council

The Council for the Town of New Tecumseth is a ten-member council which is comprised of the Mayor, Deputy Mayor and 8 councilors. The Council is responsible for developing a New Tecumseth Strategic Plan, approving an asset management policy, determining levels of service, approving the budget and overall fiscal framework.

Executive Leadership Team (ELT)

The executive leadership team is comprised of the Chief Administrative Officer (CAO), General Manager for Corporate Services (GM CS) and General Manager for Infrastructure and Development (GM I&D). The executive leadership approves asset management policies, strategies and plans. They are responsible for coordinating the Strategic Plan for the Town of New Tecumseth, as directed by Council. The Strategic Asset Management Policy must align with the Strategic Plan of the town. The General Manager for Corporate Services is the executive lead for asset management.

Steering Committee (SC)

The steering committee consists of senior leadership from all the major service areas which have significant asset portfolios; roads, parks, recreation, water, wastewater, fire, fleet and corporate services. The steering committee at the Town of New Tecumseth is comprised of:

- General Manager of Corporate Services
- Director of Public Works
- Director of Parks and Recreation
- Director of Engineering
- Manager of IT Services
- Manager of Corporate Assets

The steering committee monitors the current progress on asset management activities and provides status reports to the executive leadership team and feedback to the asset management network. The steering committee can bring in Subject Matter Experts (SMEs), for questions requiring particular areas of expertise. Areas of focus for the Steering Committee include:

- Assessment of the Town's maturity
- Hierarchy structure
- Asset Management Policy
- Technology evaluation and selection
- Asset Management Plan approval
- Discussions on levels of service and risks
- Asset management strategies

Asset Management Team (AMT)

The Asset Management Team will include the Manager of Corporate Assets and Team leads, who will represent the service areas. Team leads will be knowledgeable of and have experience with the various category of assets. They will be relied upon to provide knowledge to support the quality development of ongoing asset management plans and maintenance for their various service areas. In collaboration with the Manager of Corporate Assets and department they will develop levels of service and identify risks within each service area. The asset management process includes the operational activities of developing condition

AM Governance

assessments, levels of service, risk frameworks and strategies that meets the Town's strategic plan. Another process within asset management is referred to as capacity building. This includes developing asset management maturity within the organization through training, knowledge transfer, skill development, research and data management. The team is also responsible for developing funding opportunities that can support asset management capacity within the Town.

The asset management team will be actively involved in lifecycle activities such as acquisition, operations, maintenance, renewals, replacing, refurbishing, and disposal or decommissioning for each category of asset. The Manager of Information Technology will provide technical support to the asset management activities by promoting the integration of technical resources across the town.

Manager of Corporate Assets

The Manager of Corporate Assets is responsible to strategically develop, administer, coordinate, support, measure and communicate asset management activities. He leads the asset management department by developing policy that is in consistent with the town's strategic plan and develop strategies to meet the asset management objectives.

Corporate Team Lead – Asset Management & Network

The Team leads for asset management are staff with expertise in infrastructure who can work with the service areas in developing risk frameworks and assisting the service areas in asset management activities like lifecycle costing and developing key performance indicators (KPI's) for performance measurement. The team leads will coordinate asset management activities between the manager of corporate assets and the service areas. Tasks such as gathering data, updating system information, evaluating conditions, understanding costing, identifying new risks and evaluating various maintenance programs will be performed through this position. Team leads are identified in the Asset Management Road Map in connection with the establishment of the Asset Management Plans. Initially, while the asset management focus is corporate a Team Lead will be shared across the organization but as we develop individual service areas plans the team will expand to ensure strong technical skills are available for each asset type.

Manager of Information Technology

The Manager of Information Technology will provide expertise on identifying and implementing Technical solutions or applications that can support asset management activities. He will be responsible for leveraging the existing Geographical Interface Solution (GIS) data into any new applications as well as promoting a standard approach among the various service areas.

Communication with Governance Team

The following is the proposed meeting of asset management governance team for the year 2018 and 2019. As the maturity in asset management improves, the meeting will move to a quarterly basis with the steering team and semi-annual with the executive leadership team.

Year	AM Governance	Scheduled Meetings
2018		
	Steering Team Meetings	Monthly
	Executive Leadership Team	Quarterly
2019		Quarterly
Jan-Jun	Steering Team Meetings	Quarterly
	Executive Leadership Team	Quarterly
Jul-Dec	Steering Team Meetings	Quarterly
	Executive Leadership Team	Semi-Annual
